

SMARTPREPPED

About SmartPreppedToken

SmartPreppedToken (PREPP) is the native utility token of SmartPrepped, an educational platform focused on helping students prepare for college admissions tests. PREPP is based on the Ethereum blockchain and is designed to provide access to premium study materials, tutoring sessions, and other learning resources. The token aims to incentivize student engagement and reward educational achievements.

Introduction

SmartPreppedToken (PREPP) is the native utility token powering the SmartPrepped DApp ecosystem on Polygon. PREPP enables seamless token transactions while unlocking premium features within the platform.

Purpose & Utility

The token serves as the backbone for interactions in the SmartPrepped ecosystem, offering:

- Access to premium dApp modules
- Covered transaction fees within the platform
- Future governance participation as the ecosystem grows

Token Supply & Controls

PREPP implements owner-only minting and burning mechanisms for secure and responsible supply management.

Ecosystem Integration

PREPP is tradeable on decentralized exchanges (DEXs) such as Uniswap and SushiSwap, providing liquidity and accessibility for users.
